A DECADE OF CARGO BIKES /

Welcome to Urban Arrow.

After our first decade of cargo bikes we are not thinking of slowing down. On the contrary! The world keeps changing and the need to make cities cleaner, more efficient and environmentally friendly persists evermore urgently. Our motivation is to keep moving forward. Always ahead.

Thanks to a wonderful international community of Urban Arrow dealers and riders we are able to keep growing as an electric cargo bike manufacturer and improve our products at our headquarters in Amsterdam.

In this booklet, you will find information and all available accessories covering our complete cargo bike portfolio.

In the past decade it has become increasingly clear; a cargo bike is a way of life. A conscious decision. We choose bike over car, all day, any day. And everytime someone rides an Urban Arrow, we are grateful to be part of the future.

Drive change.

FAMILY /

The very first electric cargo bike created by Urban Arrow. Its well-known and beloved design seemingly hasn't changed much over time. Though the details always keep evolving and the design philosophy behind that is exactly what makes the Family a cargo bike that was, is and shall remain future ready.

The combination of a narrow, 2-wheeled base, a strong electric Bosch motor, a low point of gravity and the EPP box work together to create the ultimate zero-emission vehicle for your precious cargo. In and around the city.

All Family models are made of aluminum and are equipped with high quality yet low maintenance parts to keep your Family on point in appearance, safety and comfort.

Additionally, the Family sports a wide range of accessories. Take your pick and customise your bike to the optimal set-up for your tribe of loved ones.

A ride for miles of smiles.

Bosch DualBattery Kit
PowerPack not included

Bottle holder rails
Bottle holder not included

Rear carrier - Trekking
For clip-on bicycle bags

Rear carrier - Essential
Compatible with multiple seats & bags

SHORTY /

The most compact giant of our bicycle fleet is the Shorty. As long as a regular Dutch bike with the benefits of a cargo bike. This may make it our most agile and versatile bike available. A Swiss army knife that fits smaller housekeeps and businesses.

The award-winning design is a lightweight aluminum frame base with a tough EPP box, combined with a Bosch Performance Line or Cargo Line motor and other high quality parts that make it stylish as durable as you and the city need.

The wide range of accessories can upgrade the Shorty to anyone's needs. Such as the lockable hood to keep your luggage dry and safe, the child seat adapter to also take a little passenger for a ride and the all-new Raincover for giving sight to your precious cargo whilst protecting against winds and rains.

The compact giant.

CARGO /

The Cargo L and XL combine the load capacity of a van with the agility of an e-bike. It's the ultimate vehicle for your first and last mile delivery. Whether you deliver parcels or furniture, there's a Cargo for that specific task.

Designed with the city in mind. No more wasting time on being stuck in traffic or looking for a parking spot, no more fuel cost or traffic fines. Plus, the Cargo removes noise and air pollution from the transport equation while boosting the flexibility and effectiveness of your delivery fleet. This inner-city delivery vehicle really does deliver.

All the bikes in our Cargo range are equipped with the Bosch Performance Line or Cargo Line motor and a suspended front fork to smooth out your ride. Available in two lengths (L or XL) and multiple box variants to choose from up to 620 litres! It will suit your business needs without a doubt.

Smooth transport from A to B and beyond.

TENDER /

Transporting seriously heavy cargo with an electric cargo bike might seem like an impossible challenge. The collaboration with industry partners helped Urban Arrow rise to the occasion. Together we designed a more than viable answer: a new front frame to up the cargo game. The Tender is a serious competitor for hauling heavy loads in last mile transportation in and around the city.

The Tender's three-wheel base combines cycling technology with insights from the automotive industry, making it agile yet strong and stable. The dual hydraulic front disc brakes allow for quick and safe stopping of the massive cargo volume you can transport with this beast. The front wheel suspension ensures a smooth ride, no matter the weight.

New use cases lead to new models and applications as our drive for smart urban mobility and last mile perfection continues. Creating the best solutions for markets and cities all around the world.

Carry on.
